

PUTTER

ABSTRACT OF THE INVENTION

A putter is disclosed which comprises a putter head 12 affixed to a shaft 14. The putter head 12 includes a front face 24, a back face 20, and a toe face 18. Each
5 of the front face 24, back face 20, and toe face 18 can be used to strike a golf ball. The putter head 12 is unusually heavy and may comprise, for example, a single unitary body of a titanium alloy.
